

ADEGIS

We care a lot.

We secure the continuity of production

ADEGIS is a Polish company providing services that are designed to support Purchasing and Maintenance Departments in their daily work. We specialise in the sale and repair of industrial automation and we also implement modern systems for the acquisition and analysis of data from machines and production lines.

We have been operating continuously since 2010

Until a dozen years ago, we were a local micro-enterprise trading in industrial automation. Today, **we employ more than 50 people**, we work with industry leaders from Western Europe and we serve thousands of customers in Poland and abroad.

Our story is one of sustainability, which we also want to make possible for our customers - regardless of the sector and size of their company.

Offer built on real needs

01 Guaranteed response time

Maximum 24 hours

02 Min. 24 months warranty

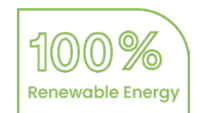

For all equipment covered by service contract

03 Costs reduction

Lower purchase costs thanks to an option of an exchange service

04 Quality and safety

Extensive technical facilities and the iron rule „no repair - no costs”

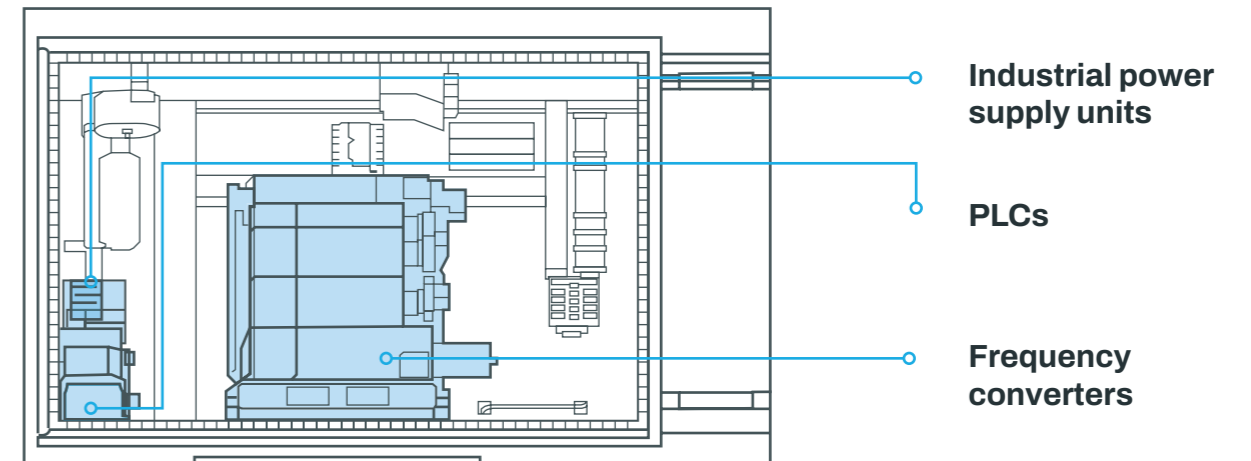

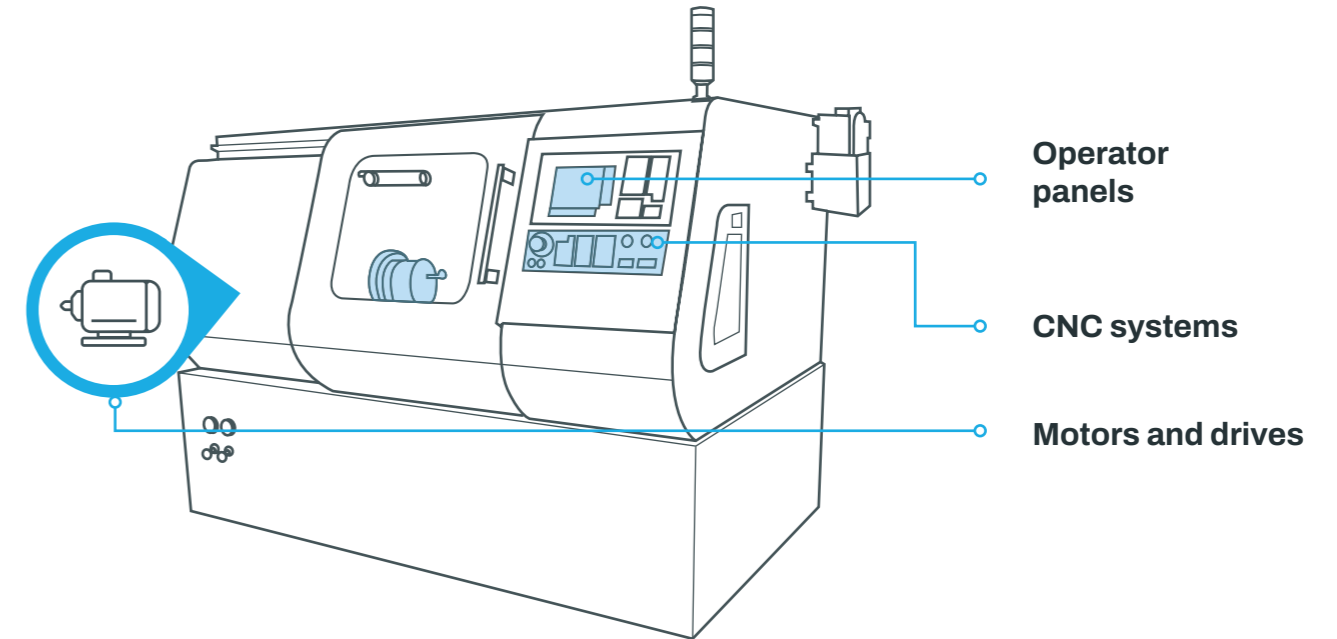

One supplier, entire industrial automation

Our online platform shop.adegis.com offers parts from leading manufacturers of industrial automation.

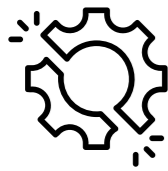

Through the shop, customers have access to up-to-date stocks and can significantly speed up the order process.
