Industrial Wireless LAN SCALANCE W788-xPRO/RR / W74x-1PRO/RR

Operating Instructions

Legal information

Warning notice system

This manual contains notices you have to observe in order to ensure your personal safety, as well as to prevent damage to property. The notices referring to your personal safety are highlighted in the manual by a safety alert symbol, notices referring only to property damage have no safety alert symbol. These notices shown below are graded according to the degree of danger.

indicates that death or severe personal injury will result if proper precautions are not taken.

indicates that death or severe personal injury may result if proper precautions are not taken.

indicates that minor personal injury can result if proper precautions are not taken.

NOTICE

indicates that property damage can result if proper precautions are not taken.

If more than one degree of danger is present, the warning notice representing the highest degree of danger will be used. A notice warning of injury to persons with a safety alert symbol may also include a warning relating to property damage.

Qualified Personnel

The product/system described in this documentation may be operated only by **personnel qualified** for the specific task in accordance with the relevant documentation, in particular its warning notices and safety instructions. Qualified personnel are those who, based on their training and experience, are capable of identifying risks and avoiding potential hazards when working with these products/systems.

Proper use of Siemens products

Note the following:

Siemens products may only be used for the applications described in the catalog and in the relevant technical documentation. If products and components from other manufacturers are used, these must be recommended or approved by Siemens. Proper transport, storage, installation, assembly, commissioning, operation and maintenance are required to ensure that the products operate safely and without any problems. The permissible ambient conditions must be complied with. The information in the relevant documentation must be observed.

Trademarks

All names identified by [®] are registered trademarks of Siemens AG. The remaining trademarks in this publication may be trademarks whose use by third parties for their own purposes could violate the rights of the owner.

Disclaimer of Liability

We have reviewed the contents of this publication to ensure consistency with the hardware and software described. Since variance cannot be precluded entirely, we cannot guarantee full consistency. However, the information in this publication is reviewed regularly and any necessary corrections are included in subsequent editions.

Introduction

2.1 Information on the Operating Instructions

Validity of the Operating Instructions

These operating instructions cover the following products:

- SCALANCE W788-1PRO
- SCALANCE W788-2PRO
- SCALANCE W788-1RR
- SCALANCE W788-2RR
- SCALANCE W744-1PRO
- SCALANCE W746-1PRO
- SCALANCE W747-1RR

These operating instructions apply to the following software version:

• SCALANCE W788-xPRO/RR or W74x-1PRO/RR with firmware as of version 4.4

Purpose of the Operating Instructions

Based on the Operating Instructions, you will be able to install and connect up the SCALANCE W788-xPRO/RR or W74x-1PRO/RR correctly. The configuration and the integration of the device in a WLAN are not described in these instructions.

Documentation on the accompanying CD

You will find detailed information on configuration in the configuration manual SCALANCE W-700 on the accompanying CD in the file:

PH_SCALANCE-W-700_76.pdf

Note

Make sure that you read the explanations and instructions in the README.txt file

2.2 Type designations

2.2 Type designations

Abbreviations used

The information in the manuals for the SCALANCE W-700 product family often applies to more than one product variant. In such situations, the designations of the products are shortened to avoid having to list all the type designations. The following table shows how the abbreviations relate to the product variants.

Product group	The designation stands for	Product name
Ethernet client modules (IP30, cabinet installation)	W74x-1	W744-1 W746-1 W747-1
Ethernet client modules (IP65, installed outside a cabinet)	W74x-1PRO/RR	W744-1PRO W746-1PRO W747-1RR
All Ethernet client modules SCALANCE W	W74x	W744-1 W746-1 W747-1 W744-1PRO W746-1PRO W747-1RR
Access points (IP30, cabinet installation)	W784-1xx	W784-1 W784-1RR
Access points (IP65, installed outside a cabinet, extreme climatic requirements)	W786-xPRO/RR	W786-1PRO W786-2PRO W786-3PRO W786-2RR
Access points (IP65, installed outside a cabinet)	W788-xPRO/RR	W788-1PRO W788-2PRO W788-1RR W788-2RR
Access points with the "RR" range of functions	W78x-xRR	W784-1RR W786-2RR W788-1RR W788-2RR

Introduction

2.2 Type designations

Product group	The designation stands for	Product name
All SCALANCE W access points	W78x	W788-1PRO W788-2PRO W788-1RR W788-2RR W786-1PRO W786-2PRO W786-3PRO W786-2RR W784-1 W784-1
All SCALANCE W devices	W -700	W788-1PRO W788-2PRO W788-2RR W788-2RR W744-1PRO W746-1PRO W746-1PRO W786-2PRO W786-2PRO W786-2RR W784-1 W784-1 W784-1 W744-1 W746-1 W747-1

Introduction

2.2 Type designations

Description

3.1 Components of the product

The following parts belong to the consignment of the SCALANCE W788-xPRO/RR or W74x-1PRO/RR:

- SCALANCE W788-xPRO/RR or W74x-1PRO/RR
- 2 OMNI antennas ANT795-4MR
- 1 IE IP 67 hybrid plug-in connector
- 1 protective cap for the M12 socket
- 2 (or 4 with SCALANCE W788-2PRO or SCALANCE W788-2RR) sealing plugs for the R-SMA sockets
- 1 SIMATIC NET Industrial Wireless LAN CD

Please check that the consignment you have received is complete. If it is not complete, please contact your supplier or your local Siemens office.

3.2 LED displays

3.2 LED displays

Information on the operating status and data transfer of the SCALANCE W-788-xPRO/RR or W74x-1PRO/RR

There are several LEDs on the front of the SCALANCE W788-xPRO/RR or W74x-1PRO/RR that provide information its operating status:

Note

If the LED for the WLAN interface is not green when the device starts up, although it is activated, the interface is not ready for operation (interface not initialized).

The main reason for this is usually that during commissioning of a SCALANCE W788xPRO/RR or W74x-1PRO/RR products, a waiting time of up to 15 minutes can occur when the ambient temperature is below zero. The device is ready for operation at the specified ambient temperature as soon as the LED for the WLAN interface is lit green.

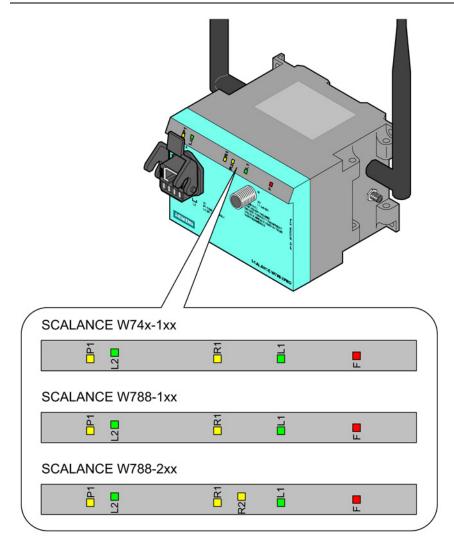

Figure 3-1 LEDs of the SCALANCE W788-xPRO/RR or W74x-1PRO/RR

3.2 LED displays

LED	Color	Meaning				
P1	Yellow	Data transfer over the Ethernet interface (traffic).				
	Green	There is a connection over the Ethernet port. (Link)				
	Flashing yellow	PRESET-PLUG detected.				
	Yellow/green	PRESET function completed successfully.				
	Flashing green	"Flashing" enabled over PST.				
L2	Green	Power supply over the hybrid connector X1 (PoE or energy contacts).				
R1	Yellow	Data transfer over the first WLAN interface.				
	Green	<i>W788-xPRO/RR in access point mode:</i> The WLAN interface is initialized and ready for operation.				
		<i>W788-xPRO/RR in client mode or W74x-1PRO/RR:</i> There is a connection over the first WLAN interface.				
	Flashing green	<i>W788-xPRO/RR in access point mode:</i> The channels are being scanned.				
		<i>W788-xPRO/RR in client mode or W74x-1PRO/RR:</i> The client is searching for a connection to an access point or ad hoc network.				
	Green flashing quickly	<i>W788-xPRO/RR in access point mode:</i> With 802.11h, the channel is scanned for one minute for primary users before the channel can be used for data traffic.				
		<i>W788-xPRO/RR in client mode or W74x-1PRO/RR:</i> The client waits for the adopt MAC address due to the setting <auto 'adopt="" find="" mac'=""> and is connected to no access point.</auto>				
	Green 3 x fast ,1	W788-xPRO/RR in client mode or W74x-1PRO/RR:				
	x long flashing	The client waits for the adopt MAC address due to the setting <auto 'adopt="" find="" mac'=""> and is connected to an access point.</auto>				
	Flashing yellow	PRESET-PLUG detected.				
	Yellow/green	PRESET function completed successfully.				

Description

3.2 LED displays

LED	Color	Meaning
R2	Yellow	<i>W788-xPRO/RR in access point mode:</i> Data transfer over the second WLAN port.
		<i>W788-xPRO/RR in client mode or W74x-1PRO/RR:</i> The LED is always off because the 2nd interface is not available in client mode.
	Green	<i>W788-xPRO/RR in access point mode:</i> The WLAN interface is initialized and ready for operation.
		<i>W788-xPRO/RR in client mode or W74x-1PRO/RR:</i> The LED is always off because the 2nd interface is not available in client mode.
	Flashing green	<i>W788-xPRO/RR in access point mode:</i> The channels are being scanned.
		<i>W788-xPRO/RR in client mode or W74x-1PRO/RR:</i> The LED is always off because the 2nd interface is not available in client mode.
	Green flashing quickly	<i>W788-xPRO/RR in access point mode:</i> With 802.11h, the channel is scanned for one minute for primary users before the channel can be used for data traffic.
		<i>W788-xPRO/RR in client mode or W74x-1PRO/RR:</i> The LED is always off because the 2nd interface is not available in client mode.
	Flashing yellow	PRESET-PLUG detected.
	Yellow/green	PRESET function completed successfully.
L1	Green	Power supply over the M12 connector (X2).
F	Red	An error has occurred during operation of the SCALANCE W788- xPRO/RR or W74x-1PRO/RR.
	Flashing red, R1 or R2 flashing green at the same time	A primary user was found on all enabled channels.

Note

Primary user (radar) on all enabled channels

If the device detects a primary user on all enabled channels (for example radio waves of a radar station), the LEDs **F** and **R1** flash. No data traffic is then possible for the next 30 minutes. After this time, the device runs the scan again and checks whether a primary user still exists. If no primary user is detected, data traffic is possible again.

The wait time of 30 minutes is necessary due to legal requirements and cannot be shortened even by resetting the device.

3.3 Reset button

Functions of the reset button

The reset button is on the rear of the device below the sealing screw directly beside the C-PLUG and has several functions:

• Restart of the device

To restart the device, press the Reset button.

• Loading new firmware

If the normal procedure with the Load & Save menu of Web Based Management does not work, the reset button can be used to load new firmware. This situation can occur if there was a power outage during the normal firmware update.

- Restoring the default parameters (factory defaults)
- Adopting the configuration data from the PRESET PLUG.

Mounting

4.1 Notes on operating the device in a hazardous area

EXPLOSION HAZARD

When used in hazardous environments corresponding to Class I, Division 2 or Class I, Zone 2, the device must be installed in a cabinet or a suitable enclosure.

Requirements for the cabinet/enclosure

To comply with EU Directive 94/9 (ATEX95), this enclosure must meet the requirements of at least IP54 in compliance with EN 60529.

4.2 Securing the housing

4.2 Securing the housing

Grounding terminal

To operate the SCALANCE W788 safely, the housing must make contact with a chassis ground cable. Do not use the SCALANCE W788 without a ground cable connected.

The ground cable can be connected to one of the securing screws. To allow this, several of the screw contact surfaces in the housing do not have a powder coating. You will find these contact surfaces on the right-hand side of the housing (when looking at the front of the housing).

Wall mounting or standard rail

Note

Installation location

There are no restrictions regarding the installation location for the device.

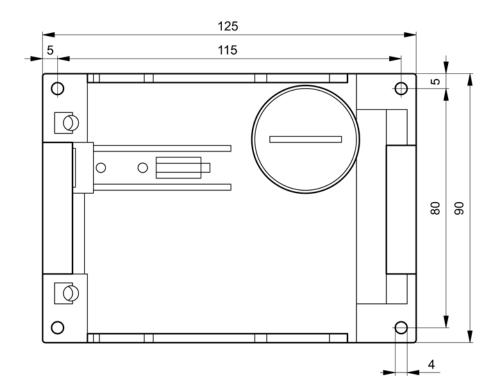

Antennas, in particular directional antennas, must be mounted in keeping with their characteristics (refer to the technical specifications of the antenna --> Radiation pattern diagrams).

There are two ways of securing the housing:

- Wall mounting Use the holes in the housing to screw the device to the wall or on a horizontal surface.
- Standard rail mounting Mount the SCALANCE W788-xPRO/RR or W74x-1PRO/RR on a 90 mm long, vertically mounted section of standard rail (S7-300). In this case, the standard rail serves as an adapter between the wall and SCALANCE W788-xPRO/RR or W74x-1PRO/RR. If you want to mount the SCALANCE W788-xPRO/RR or W74x-1PRO/RR along with a PS791-1PRO, you will require a 150 mm long standard rail.

Make sure that there is suitable strain relief for the connecting cable.

Drilling template

The location of the holes for wall mounting of the SCALANCE W788-xPRO/RR / W74x-1PRO/RR is shown in the following diagram:

NOTICE

Premature aging of the device and cables due to UV radiation

For applications outdoors, the use of the hardware SCALANCE W786 is advisable due to its greater suitability.

Protect the SCALANCE W788-xPRO/RR or W74x-1PRO/RR from direct sunlight by providing suitable shade. This avoids unwanted heating of the device and prevents premature aging of the device and cabling. When operating the SCALANCE W outdoors, it must be mounted so that it is protected from UV.

UV radiation can discolor the front panel of the SCALANCE W788-xPRO/RR or W74x-1PRO/RR. Discoloring of the front panel does not impair the mechanical stability of the device. The device must also not be subjected to long periods of rain (provide cover to protect from rain). The cover should be made of a synthetic material since metal impairs the radiation of radio waves.

Note

The minimum distance to fluorescent lamps should be 0.5 m. When installed in a cabinet, we recommend that you do not install relays on the same or on directly neighboring mounting rails.

Mounting

4.2 Securing the housing

Connecting up

5.1 Connectors for external antennas and power supply

Hybrid female connector and M12 male connector

The SCALANCE W788-xPRO / W788-xRR / W74x-1xx is attached to Ethernet via a hybrid socket on the front of the housing (position **A** in the figure). This port also has contacts for the operating voltage.

NOTICE

PoE with power source equipment

Note the following if you use PoE with a PSE (Power Source Equipment):

The chassis of an additional 24 V power supply must not be grounded!

NOTICE

Strain relief for the hybrid cable

Make sure that there is strain relief for the hybrid cable socket in both directions (along the cable axis and transverse). Forces can be exerted on the socket simply from the weight of the hybrid cable, for example when the SCALANCE W is installed high up.

Note

Protective cap for the hybrid socket

If you do not use the hybrid socket, this must be covered with a protective cap, otherwise IP 65 protection is lost. A suitable protective cap is available as an accessory (order no. 6ES7194-1JB10-0XA0). If you do not use the M12 connector, the supplied protective cap must also be fitted to retain the IP65 degree of protection.

5.1 Connectors for external antennas and power supply

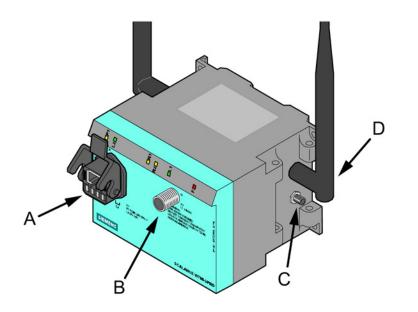

Figure 5-1 Connectors of the SCALANCE W788-xPRO/RR or W74x-1PRO/RR. The additional antenna connectors (position C) only exist for the types W788-2PRO and W788-2RR.

As an alternative or in addition to this, you can also use the M12 plug for the power supply (position **B** in the previous figure).

You can fit additional antennas to the sides of the SCALANCE W788-2PRO and SCALANCE W788-2RR with an antenna cable (position **C** in the previous figure). If you install the SCALANCE W788-xPRO/RR or W74x-1PRO/RR in a cabinet, you will need to unscrew the antennas due to the restricted communication (position **D** in the figure). In this case, the connection is over detached antennas installed outside the cabinet. On the front panel, there is also an identifier for the antenna connectors. The A connectors are on the right-hand side and B connectors B on the left-hand side.

Suitable connecting cable for a connection between SCALANCE W788-xPRO/RR or W74x-1PRO/RR and a detached antenna are available from SIMATIC NET. You will find detailed information in the section "Suitable antenna cables and antennas for the SCALANCE W-700".

Arrangement of interfaces and connectors

Note

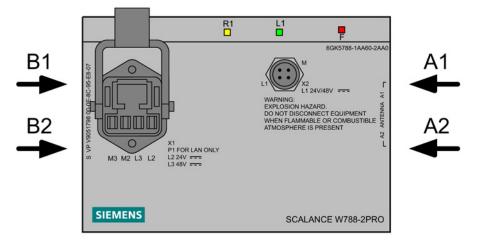

The distance between the antennas of the various WLAN interfaces must be at least 1 m.

Note

Terminating resistor

Each WLAN interface has two antenna connectors. If you use only one connector, make sure that you connect a terminating resistor to the second connector to ensure trouble-free operation of the SCALANCE W788-xPRO/RR or W74x-1PRO/RR.

5.1 Connectors for external antennas and power supply

The following figure shows the location of the sockets for the individual interfaces:

Figure 5-2 Antenna connectors of the SCALANCE W788-xPRO/RR or W74x-1PRO/RR. The antenna connectors A2 and B2 only exist for the types W788-2PRO and W788-2RR.

5.2 Replacing the C-PLUG

Procedure

Follow the steps below to replace the C-PLUG of a SCALANCE W788-xPRO/RR or W74x-1PRO/RR:

Note

In terms of the C-PLUG, the WLAN devices work in two modes:

- Without C-PLUG The device stores the configuration in internal memory. This mode is active when no C-PLUG is inserted.
- With C-PLUG

The configuration stored on the C-PLUG is displayed over the user interfaces. In this mode, the internal memory is neither read nor written. If changes are made to the configuration, the device stores the configuration directly on the C-PLUG. This mode is active when a C-PLUG is inserted. As soon as the device is started with a C-PLUG inserted, the WLAN device starts up with the configuration data on the C-PLUG.

- 1. Turn off the power to the device.
- 2. Remove the old SCALANCE W788-xPRO/RR or W74x-1PRO/RR from its mounting and open the sealing screw on the rear with a coin or broad screwdriver.
- 3. Remove the C-PLUG.
- 4. Open the sealing screw of the new device in the same way and insert the C-PLUG of the old device.
- 5. Replace the sealing screws of both devices.

If a new C-PLUG is inserted in a SCALANCE W788-xPRO/RR or W74x-1PRO/RR, the configuration stored locally on the device is saved to the C-PLUG. If an incorrect C-PLUG (for example from another device or a damaged plug) is inserted, the device signals an error with the red LED. The user then has the choice of either removing the C-PLUG again or selecting the option to reformat the C-PLUG and use it.

Note

It is essential that the configuration on the C-PLUG was generated with a firmware version ≤ the firmware version on the destination device.

Example: A C-PLUG with version V3.0 cannot be used for a SCALANCE W78x with firmware version V2.4.

5.3 Assembling an IE hybrid cable 2 x 2 + 4 x 0.34 with an IE IP 67 hybrid connector

Procedure

	Push the hexagonal nut, the sealing sleeve and the housing over the cable jacket in the order shown.
25 mm 19 mm 11 mm	 Remove the following lengths of cable jacket and shield braid: 25 mm for the power leads. 30 mm jacket for the data leads (shorten the braid by 11 mm). Cut off the filler at the height of the cable jacket.
	Arrange the data leads according to the color codes on the splice element. The following table shows the assignment of the data leads.
Contact 2 (Orange) Contact 1 (Yellow) Contact 1 (Yellow)	Contact and color assignment of the splice element.

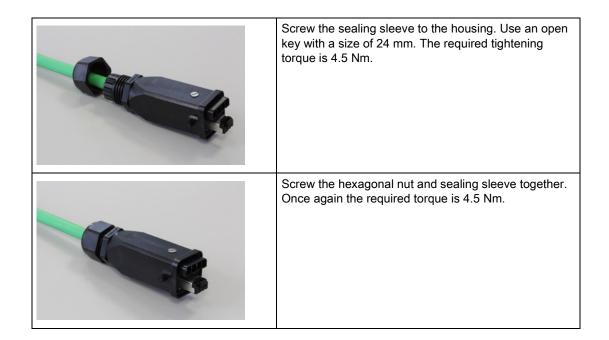

Wire color code (standard)	White	Blue	Yellow	Orange
Connector color code (Siemens IE)	White	Blue	Yellow	Orange
Siemens IE FC RJ-45 socket (reference)	3	6	1	2

Insert the all the data leads at the same time into the splice element is far as they will go.
Close the splice element and RJ-45 data module until they lock together.
Insert the data module and the splice element into the supplied IDC assembly tool.
Press the data module and the IDC assembly tool together to establish the installation piercing connection.

	Remove the assembled data module from the IDC assembly tool.
K	Position the top shield plate and press it over the cable shield.
	Position the lower shield plate and press it and the upper shield plate together until they lock together with an audible "click".
	Arrange the power leads and insert them as far as they will go into the hinge elements of the isolation body. The following table shows the assignment of the power leads.

Wire color code (standard)	Brown	Brown	Black	Black
Function	24 V	48 V PoE	Ground	Chassis PoE
Power supply insert module	1	2	3	4

	Press each individual hinge element together with the integrated IDC contact.
A Contraction of the second se	
i de la compañía de	Position the locking element on the insulator body.
	Push the housing over the assembled data module and the insulator body until they lock together (there should be an audible click).
	Secure the housing with the sealing screw

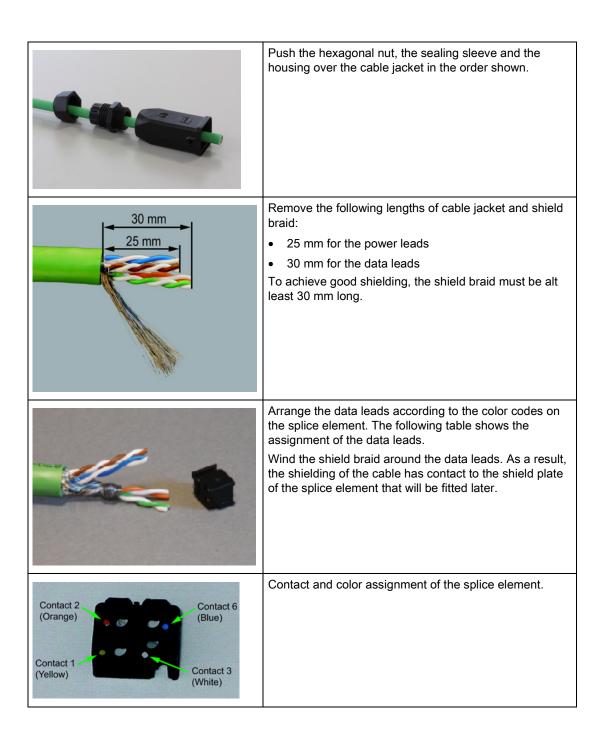

Connecting up

5.4 Fitting the IE FC TP standard cable 4 x 2 GP to an IE IP 67 hybrid connector

5.4 Fitting the IE FC TP standard cable 4 x 2 GP to an IE IP 67 hybrid connector

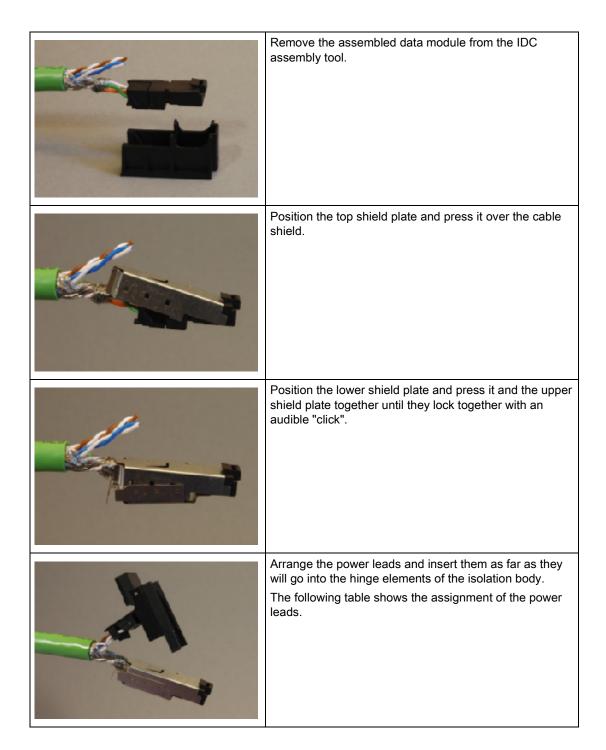

Procedure

Color coding of the standard cable	White / orange *	Orange	White / green *	Green
Connector color code (Siemens IE)	White	Blue	Yellow	Orange
Siemens IE FC RJ-45 socket (reference)	3	6	1	2

* White wire of the pair.

Insert the all the data leads at the same time into the splice element is far as they will go.
Close the splice element and RJ-45 data module until they lock together.
Insert the data module and the splice element into the supplied IDC assembly tool.
Press the data module and the IDC assembly tool together to establish the installation piercing connection.

Wire color code (standard)	White / blue *	Blue	White / brown *	Brown
Function	24 V	48 V PoE	Ground	Chassis PoE
Power supply insert module	1	2	3	4

- Press each individual hinge element together with the integrated IDC contact. Recommendation: Use a small slotted screwdriver (max. 3.5 mm) as a lever. Position the locking element on the insulator body. Push the housing over the assembled data module and the insulator body until they lock together (there should be an audible click). Secure the housing with the sealing screw
- * White wire of the pair.

5.5 Pinning of the M12 male connector

5.5 Pinning of the M12 male connector

Power supply over the M12 connector

The M12 male connector on the front of the SCALANCE W7xx has the following pinning:

Pin	Function
Pin 1	24 V DC, 48 V DC
Pin 2	
Pin 3	Ground
Pin 4	

5.6 Lightning protection, power supply, and grounding

5.6 Lightning protection, power supply, and grounding

Notes on lightning protection

Danger due to lightning strikes

Antennas installed outdoors must be within the area covered by a lightning protection system. Make sure that all conducting systems entering from outdoors can be protected by a lightning protection potential equalization system.

When implementing your lightning protection concept, make sure you adhere to the VDE 0182 or IEC 62305 standard.

Suitable lightning conductors are available in the range of accessories of SIMATIC NET Industrial WLAN:

Lightning protector LP798-2N (order no. 6GK5798-2LP10-2AA6 is the most suitable version)

Lightning protector LP798-1N (order no. 6GK5798-2LP00-2AA6)

Danger due to lightning strikes

Installing one of these lightning protectors between an antenna and a SCALANCE W-700 is not adequate protection against a lightning strike. The LP798-2N and LP798-1N lightening protectors only work within the framework of a comprehensive lightning protection concept. If you have questions, ask a qualified specialist company.

Note

The requirements of EN61000-4-5, surge immunity tests on power supply lines, are met only when a Blitzductor is used with 12 - 24 V DC and 48 V DC:

12 - 24 V DC: BVT AVD 24 type no. 918 422

48 VDC: BXT ML2 BD S48, Part no. 920245 BXT BAS, Part no. 920300 (base)

Manufacturer: DEHN+SÖHNE GmbH+Co.KG, Hans Dehn Str. 1, Postfach 1640, D - 92306 Neumarkt, Germany

5.6 Lightning protection, power supply, and grounding

Note

48 V lightning protector

When using the 48 V DC lightning protector, the power supply must be fused with 1 A.

Safety extra low voltage

WARNING

Danger to life from overvoltage, fire hazard

The equipment is designed for operation with Safety Extra Low Voltage, SELV by a Limited Power Source, LPS. (This does not apply to 100 V ... 240 V devices.)

This means that only Safety Extra Low Voltage (SELV) with Limited Power Source, LPS complying with EN60950 / EN 60950-1 / VDE0805 must be connected to the power supply terminals. The power supply unit for the equipment power supply must comply with NEC Class 2, as described by the National Electrical Code (r) (ANSI / NFPA 70).

If the equipment is connected to a redundant power supply (two separate power supplies), both must meet these requirements.

Exception:

Power supply with PELV (according to VDE 0100-410 or IEC 60364-4-41) is also possible if the generated rated voltage does not exceed the voltage limits 25 V AC or 60 V DC.

WARNING

Take measures to prevent transient voltage surges of more than 40% of the rated voltage. This is the case if you only operate devices with SELV (safety extra-low voltage).

Redundant power supply

NOTICE

Setup with redundant power supply (Power over Ethernet + 24 V DC or 48 V DC)

To use a redundant 24 V power supply (or 48 V with SCALANCE W786) and Power over Ethernet (PoE), a separate floating 24 V source (or 48 V source for W786) must be available for each SCALANCE W-700. Otherwise there is no longer isolation of the input voltages of different devices required for the PoE function and functionality may be disturbed.

5.6 Lightning protection, power supply, and grounding

Power supply without power grid

To operate the device without a connection to the power grid, you can use a solar panel. The company Solis Energy (www.solisenergy.com) offers suitable solutions. The size of the panel required depends on the daily hours of sunlight. The manufacturer provides assistance in selecting the panel. The solar solution must be designed for 15 watts.

Grounding

NOTICE

Damage to the device due to potential differences

To fully eliminate the influence of electromagnetic interference, the device must be grounded. There must be no potential difference between the following parts, otherwise the device or other connected device could be severely damaged:

- Housing of the SCALANCE W-700 and the ground potential of the antenna.
- Housing of the SCALANCE W-700 and the ground potential of a device connected over Ethernet.
- Housing of the SCALANCE W-700 and the shield contact of the connected Ethernet cable.

Connect both grounds to the same foundation earth or use an equipotential bonding cable.

Interruption of the power supply

NOTICE

Damage to the Ethernet interface

Repeated fast removal and insertion of the Ethernet cable when using Power-over-Ethernet and when there is a redundant power supply can cause damage to the Ethernet interface.

Avoid repeatedly removing and inserting the Ethernet cable when using Power-over-Ethernet and a redundant power supply.

Notes on operating the device in a hazardous area

EXPLOSION HAZARD

DO NOT CONNECT OR DISCONNECT EQUIPMENT WHEN A FLAMMABLE OR COMBUSTIBLE ATMOSPHERE IS PRESENT.

5.6 Lightning protection, power supply, and grounding

EXPLOSION HAZARD

SUBSTITUTION OF COMPONENTS MAY IMPAIR SUITABILITY FOR CLASS I, DIVISION 2 OR ZONE 2.

EXPLOSION HAZARD

DO NOT OPEN WHEN ENERGIZED.

Special notes for the SCALANCE W786-xPRO/RR

Warning Notices cULus haz.loc.

This equipment is suitable for use in Class I, Division 2, Groups A, B, C, D; Class I, Zone 2, Group IIC or non-hazardous locations.

WARNING - Cat. Nos. EAP-Wx-yy-zx (US installation only):

- PLTC cable type and manufacturer shall be specified: Listed (QPTZ), Type 5240U1 (Waterdog PLTC-ER) manufactured by Belden.

- The PLTC cable for the power supply must be installed in a manner to avoid tensile stress at the termination fittings in accordance with Article 501.10 (B)(1)(4) of the NEC.

- The PLTC cable for the power supply must be installed in accordance with Article 725.154 (D)(1) through (D)(4) of the NEC.

WARNING -Cat. Nos. EAP-Wx-yy-zx (Canadian installation only):

- TC cable type and manufacturer shall be specified: Listed (QPOR), Type JZ-604 TC manufactured by Helukabel GmbH.

- The TC cable for the power supply must be installed in areas of industrial establishments that are inaccessible to the public and in a manner that meets the requirements in Rule 12-2202(2) of the CEC:

Installed in conduit, other suitable raceway, or direct buried, when not in cable tray. Provided with mechanical protection where subject to damage either during or after installation. Installed only where qualified persons service the installation.

When operated in potential hazardous areas:

WARNING - Explosion Hazard – Do not disconnect while circuit is live unless area is known to be non-hazardous

5.7 Suitable antenna cables and antennas for SCALANCE W-700

5.7 Suitable antenna cables and antennas for SCALANCE W-700

Antenna connector: N-Connect/R-SMA connecting cable

The N-Connect/R-SMA male/male flexible connecting cable is available as an accessory for direct connection of an antenna to a SCALANCE W-700.

Length in m	Order number
1	6XV1875-5CH10
2	6XV1875-5CH20
5	6XV1875-5CH50
10	6XV1875-5CN10

Antenna connector: N-Connect/ N-Connect connecting cable

The N-Connect/N-Connect male/male flexible connecting cable is available as an accessory for connecting an antenna to the lightning protector LP798-1N.

Length in m	Order number
1	6XV1875-5AH10
2	6XV1875-5AH20
5	6XV1875-5AH50
10	6XV1875-5AN10

There is a control cabinet feedthrough available for IWLAN devices located in a control cabinet. You will find detailed information in the catalog IK PI.

Antennas

The following antennas have been approved for use with a SCALANCE W-700:

Туре	Properties	Order no.
ANT795-6MN	Omni antenna 2.4 / 5 GHz, ceiling mounted	6GK5795-6MN00-0AA6
ANT792-6MN	Omni antenna 2.4 GHz, wall mounted	6GK5792-6MN00-0AA6
ANT793-6MN	Omni antenna 5 GHz, wall mounted	6GK5793-6MN00-0AA6
ANT792-8DN	Directional antenna 2.4 GHz, wall mounted	6GK5792-8DN00-0AA6
ANT793-8DN	Directional antenna 5 GHz, wall mounted	6GK5793-8DN00-0AA6
ANT795-6DN	Directional antenna 2.4 / 5 GHz, wall mounted	6GK5795-6DN00-0AA6

5.7 Suitable antenna cables and antennas for SCALANCE W-700

Туре	Properties	Order no.
ANT795-4MR	Omni antenna 2.4 / 5 GHz, mounted directly on a SCALANCE W788-xPRO/RR or W74x-1PRO/RR	6GK5795-4MR00-0AA6
ANT795-4MS	Omni antenna 2.4 / 5 GHz, mounted directly on a SCALANCE W788-xPRO/RR or W784-1xx or W74x-1PRO/RR or W74x-1	6GK5795-4MS00-0AA6
ANT792-4DN	RCoax antenna 2.4 GHz	6GK5792-4DN00-0AA6
ANT793-4MN	RCoax antenna 5 GHz	6GK5793-4MN00-0AA6

NOTICE

ANT795-4MS

The ANT795-4MS antenna has degree of protection IP30 and is therefore suitable for a dry environment.

5.8 Cabling for power supply and Ethernet

5.8 Cabling for power supply and Ethernet

Suitable cables

The following cables are available for connecting a SCALANCE W788-xPRO/RR or SCALANCE W74x-1PRO/RR to the power supply and Ethernet:

• IE hybrid cable 2 x 2 + 4 x 0.34 (order no. 6XV1870-2J)

The two data wire pairs are separately shielded. This cable is particularly suitable for assembly with the IE IP 67 hybrid connector.

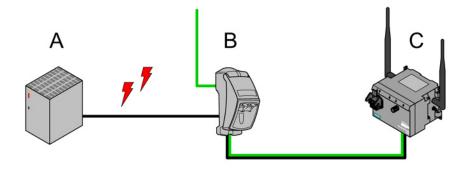

• IE FC TP standard cable 4 x 2 GP (order no. 6XV1870-2E)

In these cable types, two wires are twisted. All four pairs of wires are inside a common shield.

• 2 x 2 IE cable, the optional power supply (18 - 48 V DC) is over M12 connectors.

Cable selection and interference exposure

A decisive factor in the selection of a cable type is the electromagnetic interference to which the current lines between the power supply and the FC RJ-45 modular outlet are subjected. Due to the separate shielding of the data wires, such interference has less effect on the data transmission on a hybrid cable than on TP standard cable or TP flexible cable.

- Figure 5-3 Wiring a SCALANCE W788-xPRO/RR with electromagnetic interference between the power supply and modular outlet A power supply B FC RJ-45 modular outlet with power insert

- SIMATIC NET SCALANCE W788-2PRO
- SIMATIC NET SCALANCE W788-1RR
- SIMATIC NET SCALANCE W788-2RR

are largely identical. Unless indicated otherwise in the table, the following tables apply to all the devices listed above:

Data transfer

Ethernet transfer rate	10/100 Mbps
Wireless transmission rate	1 54 Mbps (108 Mbps)
Wireless standards supported	802.11a 802.11b 802.11g 802.11h
Power supply standards supported	802.3af (Power over Ethernet)

Interfaces

Note

Bridging a power outage is possible only with an input voltage of 24 VDC (-15% ... +20%).

Power	 M12 connector 24 VDC, 48 VDC (minimum permitted voltage 18 VDC, maximum permitted voltage 57 VDC)
	Power contacts in hybrid connector 24 VDC, 48 VDC (minimum permitted voltage 18 VDC, maximum permitted voltage 57 VDC)
	 RJ-45 jack Power over Ethernet (48 VDC)
	The following applies to all named power contacts:
	Power supply cables isolated according to IEEE 802.3af, isolation resistance > 2 Mohms.
Data	IE IP67 hybrid connector
	R-SMA antenna sockets (2 x or 4 x with the 788-2PRO)

Electrical data

Maximum power consumption	< 9 W
Typical power consumption (a wireless card)	6 W
Typical power consumption (two wireless cards)	7 W

Construction

Dimensions without antennas (W x H x L)	125 mm x 88 mm x 108 mm
Weight	approx. 1050 g

Permitted ambient conditions

Operating temperature	-20°C to 60°C	
Transportation/storage temperature	-40°C to 70°C	
Degree of protection	Tested to IP65	

MTBF information (mean time between failure)

MTBF	67 years

PNIO - performance data

Even in the planning phase of a plant, it is important to know the reaction time of IO communication and the delay time for data communication in a PROFIBUS, PROFINET IO or Industrial Ethernet network. To provide you with reliable information on typical plants with different topologies, a large number of different configurations have been set up and measured. Based on these measured values, you can do the following:

- Design plants ideally in terms of their communication response and
- Compare different plant configurations with each other

You will find the measured values with the following link: http://www.siemens.de/automation/pd 6.2 Dimension drawing SCALANCE W788

SCALANCE W788-xPRO/RR / W74x-1PRO/RR Operating Instructions, 07/2014, A5E02280448-08

FCC approval

This device complies with Part 15 of the FCC Rules.

Operation is subject to the following two conditions:

(1) this device may not cause harmful interference, and

(2) this device must accept any interference received, including interference that may cause undesired operation.

Notice

Changes or modifications made to this equipment not expressly approved by SIEMENS may void the FCC authorization to operate this equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Notice

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20 cm between the radiator and your body.

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter. Professional Installation Notice:

To comply with FCC part 15 rules in the United States, the system must be professionally installed to ensure compliance with the Part 15 certification. It is the responsibility of the operator and professional installer to ensure that only certified systems are deployed in the United States. The use of the system in any other combination (such as co-located antennas transmitting the same information) is expressly forbidden.

Note

In the USA, the "ANT793-8DN" antenna is approved only for wireless mode 802.11a!

Note

The specified approvals apply only when the corresponding mark is printed on the product.

RSS-210 of Industry Canada

"Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device."

"This device has been designed to operate with the antennas listed below*, and having a maximum gain of 18 dBi. Antennas not included in this list or having a gain greater than 18 dBi are strictly prohibited for use with this device. The required antenna impedance is 50 ohms."

"To reduce potential radio interference to other users, the antenna type and its gain should be so chosen that the equivalent isotropically radiated power (e.i.r.p.) is not more than that permitted for successful communication."

"That the device for the band 5150-5250 MHz is only for indoor usage to reduce potential for harmful interference to co-channel mobile satellite systems."

"Users should also be cautioned to take note that high power radars are allocated as primary users (meaning they have priority) of 5250-5350 MHz and 5650-5850 MHz and these radars could cause interference and/or damage to LE-LAN devices."

* For more detailed information on the approved antennas, refer to the section "Technical specifications".

Note

In Canada, the "ANT793-8DN" antenna is approved only for wireless mode 802.11a!

Note

The specified approvals apply only when the corresponding mark is printed on the product.

NCC Warning Statement (Taiwan)

Article 12

Without permission, any company, firm or user shall not alter the frequency, increase the power, or change the characteristics and functions of the original design of the certified lower power frequency electric machinery.

Article 14

The application of low power frequency electric machineries shall not affect the navigation safety nor interfere a legal communication, if an interference is found, the service will be suspended until improvement is made and the interference no longer exists.

Note

The "ANT793-8DN" antenna is not approved in Taiwan!

Note

The specified approvals apply only when the corresponding mark is printed on the product.

KCC Statement (Republic of Korea)

사용자안내문(제5조제1항제1호관련)

기 종 별	사 용 자 안 내 문
A 급 기기	이 기기는 업무용(A 급)으로 전자파적합등록을 한
(업무용 방송통신기기)	기기이오니 판매자 또는 사용자는 이 점을
	주의하시기 바라며, 가정외의 지역에서 사용하는

Note on approval in Bahrain

The operator/owner of this device must comply with the 2.4 GHz and 5 GHz Frequency Licensing Regulation and technical specifications, and must also obtain the necessary licenses in order to use these frequencies in accordance with the Telecommunications Law (refer to section 43 and 44).

Notes on approval in Brazil

Note

The specified approvals apply only when the corresponding mark is printed on the product.

7.2 National approvals

7.2 National approvals

National approvals

The following table lists the countries in which the SCALANCE W700 product is approved. The diamond symbol (♦) identifies all countries for which there was no approval at the time these operating instructions were written.

The current status of the approvals can be found on the Internet at the following address:

Http://www.siemens.com/funkzulassungen
